# Image Extraction Plugin

Place "Image Extraction Plugin.jsfl" in below path and It should be display under the commands menu in flash.

C:\Users**User Name**\AppData\Local\Adobe\Flash CS6\en_US\Configuration\Commands

Step to use this Plugin -

1.	Open your flash file

2.	Select "Image Extraction Plugin" under the commands menu.

3.	Select a folder to export all images from flash.

Note:

1.	This flash plugin will not export drawing objects which are not converted into any flash symbols (Graphic, Movie clip and button) because it exports objects/symbols from flash library.
2.	This flash plugin is tested on Adobe Flash Professional CS 5 and Flash Professional CS 6.

Please feel free to contact to me if you have any issue.
